PROFESSIONAL SUMMARY

Inventory Analyst with 4+ years of experience in SAP MM, inventory governance, stock reconciliation, audit support, and warehouse operations. Skilled in Power BI, SQL, Advanced Excel, and dashboard development for inventory intelligence and decision support. Proven ability to improve inventory accuracy, identify operational risks, optimize processes, and transform complex business data into actionable insights.

TECHNICAL & FUNCTIONAL SKILLS

ERP & Inventory Systems

- SAP MM
- Inventory Management
- Material Movement Control
- Stock Reconciliation
- Goods Receipt (GRN)
- Goods Issue (GI)
- Physical Stock Verification
- Cycle Counting
- Inventory Auditing

Data Analytics & Reporting

- Power BI
- SQL
- Advanced Excel
- DAX
- Power Query
- Dashboard Development
- MIS Reporting
- Data Visualization
- KPI Monitoring

Supply Chain & Operations

- Inventory Planning
- Inventory Optimization
- Warehouse Operations
- Vendor Stock Reconciliation
- Inventory Variance Analysis
- Material Flow Analysis
- Process Improvement
- Root Cause Analysis

Audit & Compliance

- Internal Audit Support
- Inventory Compliance
- ISO 9001 Documentation
- Audit Documentation
- Process Governance

Soft Skills

- Analytical Thinking
- Problem Solving
- Cross Functional Coordination
- Stakeholder Communication
- Decision Support Reporting

PROFESSIONAL EXPERIENCE

Inventory Analyst | SAP MM

L.G. Balakrishnan & Bros. Ltd.

Mar 2025 – Present

Key Responsibilities & Achievements

- Managed inventory operations through SAP MM covering approximately 10,000+ materials across multiple storage locations and plants.
- Performed stock reconciliation and inventory variance analysis resulting in approximately 80% improvement in inventory accuracy.
- Conducted cycle counting and periodic inventory audits covering inventory worth ₹16 Cr.
- Supported internal and statutory audits with audit-ready documentation and compliance tracking.
- Developed MIS reports and analytical dashboards for inventory monitoring and management decision-making.
- Identified slow-moving and non-moving inventory categories supporting inventory optimization initiatives.
- Coordinated with production, procurement, and warehouse teams to ensure uninterrupted material availability.
- Investigated inventory discrepancies and implemented corrective actions reducing recurring stock variances by 80%.
- Supported SAP MM transaction monitoring and inventory process governance.

Inventory / Warehouse Executive

Goflex Wires & Cables | C.R.I. Pumps Pvt. Ltd.

Jun 2022 – Dec 2024

Key Responsibilities & Achievements

- Managed inventory operations across 5,000+ SKUs and multiple warehouse locations.
- Executed SAP MM transactions for inventory movement, stock transfers, and material tracking.
- Performed physical inventory verification and cycle counting activities improving stock accuracy by 90%.
- Supported ISO 9001 compliance and quality audit requirements.
- Assisted in warehouse process improvement initiatives enhancing inventory visibility and control.
- Collaborated with cross-functional teams to improve inventory discipline and operational efficiency.
- Reduced stock discrepancies through systematic monitoring and reconciliation processes.

PROJECTS

GRN Shortage Analytics Suite V2 — Inventory Intelligence & Executive Decision Support

WPS Office | Advanced Excel Formulas | Inventory Analytics | Vendor Performance | Executive Reporting

- Designed and developed a formula-driven GRN shortage Analytics solution converting transactional shortage data into vendor, material, delay, risk and executive decision insights.
- Built interconnected Executive Dashboard, Material Analysis, Material Deep Dive, Vendor Analysis and Executive Review modules with dynamic Vendor, Material, Posting Month and Status filtering.
- Engineered reusable analytical layers using **SUMPRODUCT, SUMIFS, COUNTIFS, INDEX/MATCH, RANK, IF, MAX/MIN and TEXTJOIN** for aggregation, ranking, risk classification, dynamic retrieval and executive insights.
- Developed vendor performance, material exposure, delay classification, risk, KPI, trend and Pareto engines, separating calculation logic from dashboard presentation for maintainability and independent validation.
- Converted analytical findings into **Executive Priorities and a Management Action Plan**, creating a structured **Data → Analysis → Risk → Priority → Action** decision flow.
- Applied a validation-first QA framework covering source reconciliation, individual/combined filter testing, engine validation, KPI, Pareto, chart, insight and executive-review testing before final approval.

Tools / Skills

WPS Office | Advanced Excel Formula Engineering | Inventory Analytics | GRN Analysis | Vendor Performance | Material Risk Analysis | Pareto Analysis | KPI Design | MIS Reporting | Executive Decision Support

Retail Inventory Intelligence Solution

Power BI | DAX | Power Query | Inventory Analytics

Business Objective

Develop an executive-level inventory intelligence platform for inventory monitoring, replenishment planning, inventory risk identification, and business decision support.

Key Contributions

- Analyzed 1,670 products across 14 inventory categories.
- Identified 453 out-of-stock products and 546 low-stock products.
- Quantified inventory risk exposure worth ₹7.20 Lakhs.
- Developed Executive Inventory Dashboard, Inventory Risk Dashboard, Product Intelligence Dashboard, and Executive Recommendation Dashboard.
- Delivered inventory visibility and replenishment insights through automated KPI reporting.

Technologies

Power BI, DAX, Power Query, Excel

Inventory Variance Control Study – Heat Treatment Stage

Key Contributions

- Investigated inventory discrepancies affecting 42 materials.
- Identified root cause resulting in –1161 quantity variance.
- Developed analytical reporting framework for variance monitoring.
- Recommended process control improvements to strengthen inventory governance.

Technologies

SAP MM, Power BI, Excel

Weighing Scale Accuracy & Inventory Conversion Analysis

Key Contributions

- Conducted process study to analyze inventory conversion discrepancies.
- Identified scale resolution limitations causing systematic quantity variation.
- Validated measurement behavior through controlled testing.
- Reduced ambiguity in reconciliation and audit investigations.

Technologies

Excel, Statistical Analysis, Process Validation

SAP MM Inventory Flow Analysis

Key Contributions

- Analyzed inventory movement life-cycle from Goods Receipt to Consumption and Reconciliation.
- Identified material-level discrepancies impacting inventory accuracy.
- Developed Power BI MIS dashboard for inventory movement tracking.
- Improved visibility into inventory transactions and variance patterns.

Technologies

SAP MM, Power BI, Advanced Excel

CERTIFICATIONS

Microsoft Power BI Workshop - By Skill Nation
Microsoft Excel using AI

EDUCATION

Bachelor of Computer Applications (BCA)
Madurai Kamaraj University
Theni, Tamil Nadu
Year of Graduation: 2022

ADDITIONAL INFORMATION

- Total Professional Experience: 4+ Years
- Domain Experience: Manufacturing & Inventory Operations
- Open to Inventory Analyst, Supply Chain Analyst, MIS Analyst, SAP MM Analyst, and Operations Analyst roles
- Actively building expertise in Business Analytics and Data-Driven Decision Making
